

Boeing 737-MAX Case Study

17-313 Fall 2024

Foundations of Software Engineering

<https://cmu-17313q.github.io>

Eduardo Feo Flushing

Administrivia

- Project 1B due Thursday, Sep. 5th, 11:59PM
- Make sure you read the assignment carefully, many points are **not** tied to code.
- Check the announcement about files that are not covered by tests
- Slack:
 - Use #project-one instead of direct messages / emails
 - Alternatively, create a private chat and include all course staff
- [Continuous Course Feedback Form](#)
 - Help us improve your 17-313 experience

Smoking Section

- Last full row

Discussion

Participation Activity

- In groups of 2-3
- **One or two** lessons that could be learned from this study
- **One or two** things we could do in our software projects to prevent us from encountering a similar situation
- Write it down on a piece of paper with your Andrew ID(s) on it.
- Share with the class!
